Experience

Business Intelligence Engineer

12/2025 - Present

VPBank | Major Vietnamese commercial bank

Hanoi, Vietnam

- Managed and optimized the end-to-end data pipelines for **10+ Power BI lending reports**, while migrating their SQL stored procedures from on-premises SQL Server to Amazon Redshift, reducing processing time by **25%**.
- Owned end-to-end development of the **SME Debt Management module**, translating stakeholder requirements into Redshift data models and Power BI dashboards for monitoring NPL, debt classification, and credit quality.
- Analyzed SME loan-processing turnaround time (TAT) across **15+ workflow stages**, identifying process bottlenecks and delivering actionable insights to business leadership to prioritize workflow improvements.

Data Engineer

07/2025 - 12/2025

CMC Global | IT consulting and digital transformation provider

Hanoi, Vietnam

- Designed source-to-target data mappings for **20+ tables** across multiple source systems, defining standardized schemas and transformation logic to improve data consistency and support downstream analytical models.
- Developed **8 Spark jobs** for Silver-to-Gold transformations, implementing business rules and aggregations to create curated Gold-layer datasets for BI reporting and dashboard consumption.
- Implemented **60+ SQL-based data validations checks** across Bronze, Silver, and Gold tables, validating transformation logic, record consistency, and key business metrics across layers.

Data Engineer Intern

03/2024 - 05/2024

PromptCorp | Australian facility and asset management provider

Melbourne, Australia

- Developed and optimized ETL pipelines with Python and Airflow to ingest HubSpot API data into **8 PostgreSQL tables**, establishing a centralized single source of truth and improving data retrieval speed by **40%**.
- Built **4 Superset dashboards**, improving access to operational insights and reducing decision-making time by **25%**.

Data Engineer Intern

01/2024 - 03/2024

Naviworld | Microsoft Dynamics 365 ERP & BI solutions provider

Melbourne, Australia

- Built and orchestrated ELT pipelines with Fabric Data Factory, Dataflow Gen2, and T-SQL to backfill **500K+ historical Dynamics 365 Business Central records** into Microsoft Fabric Data Warehouse and enable daily incremental loads.
- Delivered **3 Power BI dashboards** with **50+ DAX measures** for **4 stakeholders**, reducing report preparation time from **3 days to 1 day** and enabling faster performance tracking.

Projects

AeroStream Flight Analytics | *dlt, dbt, Clickhouse, Airflow, Superset* | [GitHub](#)

- Built a Medallion data warehouse processing **38.3M flight records**, modeling a **Kimball star schema** (5 dims, 2 facts) with **262 dbt tests** enforcing data quality across **24 models**.
- Developed **5 Superset dashboards** analyzing flight performance, uncovering a **5x spread in delay rates** across departure times (6.6% - 32.3%), larger than the variation across airlines.

Skills

Languages: SQL, Python

Business Intelligence & Analytics: Power BI, Tableau, Superset, Metabase, Excel

Data Engineering & Cloud: dbt, Spark, Airflow, Snowflake, Databricks, Microsoft Fabric, Docker, AWS, Azure, Terraform

Tools & Collaboration: Git, Jira, Confluence, Teams, DBeaver

Education

Swinburne University of Technology

02/2022 - 12/2024

Bachelor of Computer Science, Major in Data Science

Melbourne, Australia

- GPA: 3.54 / 4.0 (High Distinction)
- Swinburne International Excellence Scholarship (75% tuition)
